Re: Reference letter for Ms. Helia Golmohammadi (Dawson ID 1839001)

I would hereby like to recommend the above student for entrance in the Design and Computation Arts Program at Concordia University. Last year I had the pleasure of being Helia's professor in two courses: *Cell and Molecular Biology and Human Anatomy & Physiology*.

These particular courses are probably the most rigorous offered by our department, they involve many concepts in physical chemistry, organic chemistry, and also detailed physiology of several human organ systems. Ms. Golmohammadi was amongst the top 3 students in both classes.

Helia is a very dedicated student, showing a high degree of commitment. She displayed thorough understanding of the topics covered during lectures and lab sessions. She is very interested and motivated in pursuing a career in Design. Her letter of intent shows how serious she is about developing new sustainable designs (ex. electric cars & smart vehicles, biodegradable products) and clearly shows a long time interest in specializing in environmental design.

Last semester, Helia did a fascinating oral presentation on Visual Perception and brain integration of visual information (as part of the anatomy & physiology course). Her project was one of the best I had seen in years! An incredibly determined student with an impressive academic record.

I know that Helia has all the aptitudes required to successfully undertake studies at University. I base this statement not only from time spent with her in class, but also on some occasions where we had the opportunity of conversing (in office or online). She's a very amicable and courteous person, as well as combining high standards of academic performance.

It is my opinion as biology professor that Helia would constitute a great asset to your student body this year. Don't hesitate to contact me should you require any additional information about this applicant.

Thank you very much,
Rami Hanna
